

Do You Have Complete Visibility and Control Across Every Endpoint?

Manage, secure, optimize every device, every user, every threat – from one intelligent platform, built for modern enterprises.

● **6M+**
Devices

● **30,000+**
Offices

● **15+**
Years

● **10**
Modules

Ghost Assets

Devices go missing. Forgotten endpoints drain budgets and harbour undetected threats. You're paying for hardware you can't see.

Unpatched Endpoints

80% of cyberattacks exploit known vulnerabilities. Every delayed patch is an open invitation sitting on your network.

Compliance Panic

DPDPA penalties reach Rs.2,500 Cr. Without automated enforcement, audit season is chaos – and the risk is yours.

Fragmented IT Tools

Your team juggles 8-12 separate tools. Context is lost, response is slow, costs compound, and threats slip through the gaps.

There's a smarter way to run IT. And it starts with complete visibility.

One platform. Ten modules. Complete visibility, security, and control – with zero compromise.

Energy Savings

Up to 50% savings with AI sensors that reduce power waste.

Asset Management

Track 100+ IT & non-IT assets in real-time, including hardware, software, and warranties.

Asset Lifecycle

Gain full oversight of IT & non-IT assets with tracking, governance, and automation for better efficiency.

Website Monitor

Monitor uptime, SSL, and performance to catch issues before customers do.

Server Monitoring

Track server health, utilization, uptime, and thresholds with intelligent alerts.

Patch Management

Auto-patch OS and third-party endpoints, with sandbox testing, rollback, and vulnerability assessment.

Policy & Compliance

1,000+ canned policies for CIS and DPDPA compliance, with real-time audits and automated application.

DataSync

Encrypted, versioned, and malware-protected backups on-prem or with Sovereign Cloud.

Help Desk

AI-powered ticketing, SLA management, RBAC, chatbot resolution, and self-service portal.

Employee Productivity

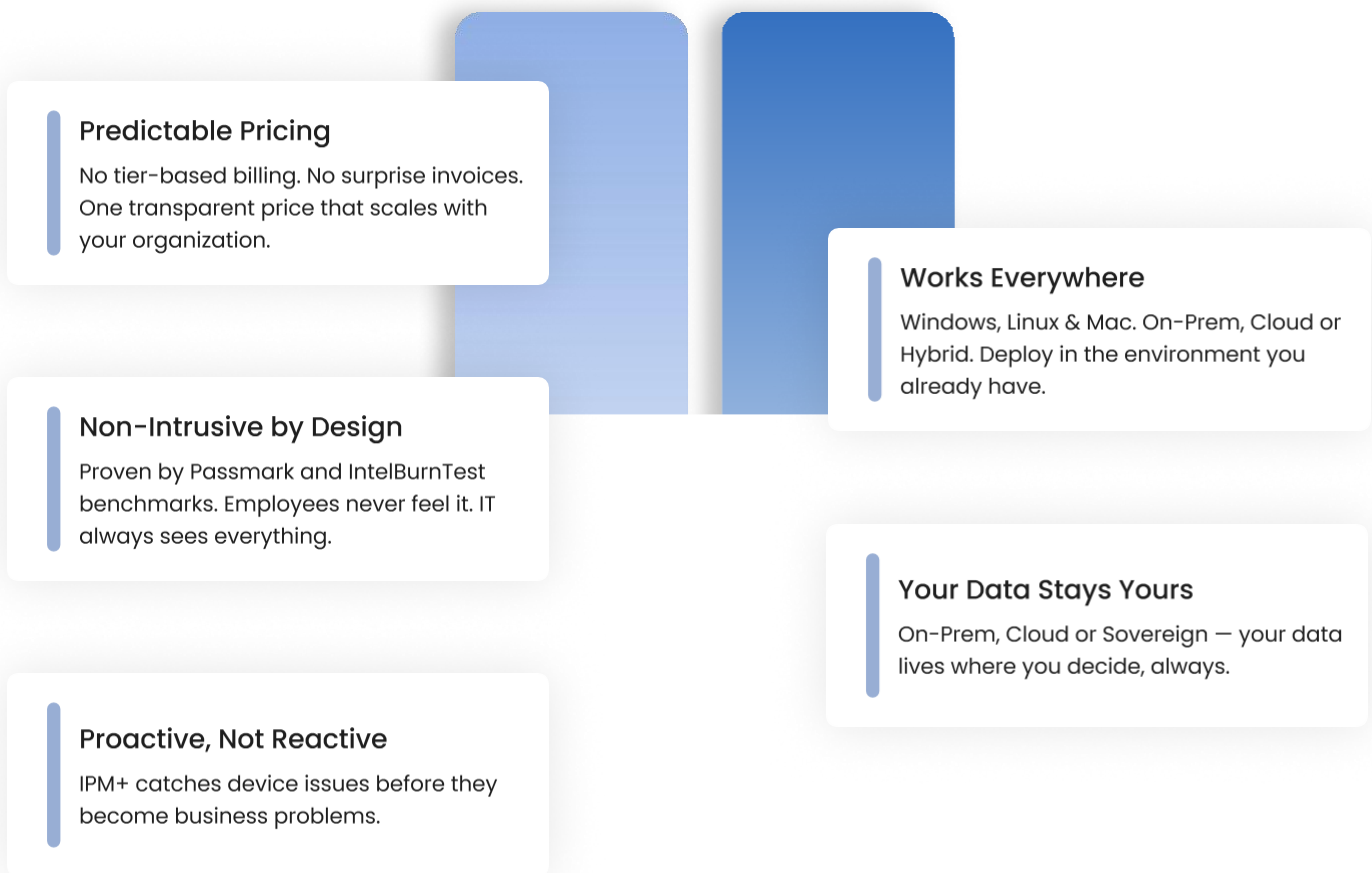

Track active time, app usage, browsing, and liveness checks in real-time.

Deployed. Measured. Proven.

Why Customers Trust IPM+

Deployed. Tested. Trusted.
